

## **Start-up medical device company seeking full-time Manufacturing / Install Technician**

**Vesticon** is a startup company that offers an exciting opportunity to work in a fast paced and rewarding environment where you would have a significant impact on manufacturing, build and install processes. Vesticon currently has one product on the market and several more in R&D. Vesticon offers career growth, a generous benefit package and a pleasant and creative work environment.

### **Manufacturing / Install Technician**

#### **Job Description:**

- Build / assemble Epley Omniax units.
- Complete and troubleshoot the limited electrical wiring of Epley Omniax.
- Complete and troubleshoot the tuning and calibration of the Epley Omniax.
- Setup and configure Windows based computers for used with Epley Omniax (customize hardware / software installed on the laptop & desktop computers, modify system settings, configure routers and setup a private network). Vesticon will only provide limited training related to system setup and configuration.
- Understand and implement quality procedures in manufacturing (make sure all paperwork is completed and filled out) for everything from defective parts to improper hardware.
- Receive and organize inventory, continuously update on-hand-quantity, and appropriately alert purchasing when inventory is low.
- Proactively identify errors / discrepancies in build instructions / Bill of Materials / part numbers etc and work with engineering to ensure the errors are captured and corrected.
- Maintain the warehouse and shop.
- Maintain the tools and Fork Lift.
- Visit customer for installation and maintenance.
- Interface with customers for support and follow-up.

This Job involves:

- Frequent travel to customer sites all over USA for installation and support, at times with very short notices.
- May also require international travel.
- Lifting & moving heavy loads required on occasion.
- There will be infrequent work requiring overtime including weekends.

#### **Job Requirements:**

- Certificate in Mechanical / Machine / Manufacturing technology.
- Must be familiar with using tools like calipers, drills, torque wrenches etc.
- Must be able to read blueprints and validate parts based on the prints.
- Must have some electrical experience (Must be able to solder, crimp connectors, handle basic electrical wiring of appliances).
- Must be able to operate a Fork Lift.

- Operate Microsoft Windows based computers and use Microsoft Outlook, Word and Excel.
- Excellent written and verbal communication skills.
- 2-3 years of work experience in manufacturing (small company experience is a must).
- Job related travel experience preferred.
- Valid driving license required.
- Criminal and other background checks required.
- Drug test required.
- Must have excellent references.

Salary Range: \$12 - \$20 / Hr depending on experience.
